Portfolio

EDUCATION

New York University

Sep 2025 – May 2027

Master of Science in Computer Engineering, **GPA: 3.73/4.0**

New York, USA

Courses: Computer Architecture, Embedded Systems, Machine & Deep Learning, Systems Engineering, MLOps, Big Data

Dwarkadas J. Sanghvi College of Engineering (DJSCE)

Nov 2022 – Jun 2025

Bachelor of Technology in Computer Engineering, **CGPA: 9.35/10**

Mumbai, India

Courses: DSA, Operating Systems, OOP, Database Systems, Software Eng, Computer Networks, AI, IoT, Software Testing

SKILLS

Languages : Python, Java, C++, C, C#, JavaScript, TypeScript, Dart, SQL, HTML, CSS, MATLAB

Frameworks & Libraries : Node.js, React, Angular, Express, Flutter, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch

Databases & Cloud : PostgreSQL, MySQL, MongoDB, MSSQL, Snowflake, Firebase, AWS, Azure, Google Cloud (GCP)

DevOps & Tools : Git, GitHub, Docker, Kubernetes, REST APIs, CI/CD, Agile/Scrum, Postman, UiPath Studio, Figma

EXPERIENCE

UiPath | Automation Developer Intern

Jun 2026 – Aug 2026

- Contributed to client-facing **RPA**, Document Understanding and **Agentic AI** automation solutions using **UiPath Studio**.
- Built and deployed **end-to-end automation workflows** and **multi-agent orchestration pipelines** with API integrations, collaborating cross-functionally with PMs, BAs, and Solution Architects on enterprise deployments.
- Contributed to UiPath's internal **project estimation platform**, implementing and testing features for end-to-end estimate creation, tracking, and validation, using **React**, **TypeScript**, and **UiPath Data Fabric**.

New York University | Graduate Assistant, Computer Engineering Labs

Sep 2025 – May 2026

- Developed **software control algorithms** and **automation scripts** for the Beacon Bot project with Professor Michael Knox, applying **directional signal processing** and advancing robotic accuracy by 25%.
- Maintained and optimized 20+ lab systems across 3 labs, performing **software diagnostics**, **firmware updates**, and **programmed monitoring**, minimizing downtime by 50%.
- Configured real-time data capture from oscilloscopes and signal generators using **Python** and **pyvisa**, cutting manual effort by 90% and accelerating experimental workflows.

Nuvama Wealth | Software Engineer Intern

Feb 2025 – Aug 2025

- Engineered and deployed **modernized modules** for legacy systems using **Angular**, **.NET Core**, and **MS SQL** within a **15-member engineering team**; authored **SRS documentation** and conducted functional testing.
- Led development of a secure **WhatsApp Web Chat Logger** with the **CTO** and **senior leadership**, enabling efficient archiving and **compliance-ready backups** for 100% of users.

PROJECTS

Mealie Recipe Recommender

May 2026

- Built an end-to-end **ALS collaborative filtering** training pipeline on **Chameleon Cloud**, trained on **1.1M+ interactions** from the Food.com dataset to power personalized recipe recommendations in Mealie.
- Tracked **5+ experiments** using **MLflow** with **MinIO** artifact storage and **PostgreSQL** backend; containerized full training stack with **Docker** and managed model versioning via the MLflow Model Registry.
- Designed a **scalable data pipeline** processing raw interaction data into user-item matrices; integrated trained model with **REST APIs** to serve real-time recommendations inside the Mealie web application.

IoT Enabled Robot for Gas Pipe Leakage Detection | Patent No.: 202421078054, 202521045231, 458534

Apr 2026

- Led development of a mobile-controlled robot capable of traversing horizontally and vertically for gas leakage detection.
- Designed a patented fidget spinner mechanism with magnets and a **Flutter** app, reducing field efforts by **90%**. Incorporated **MQ sensors** with location tracking, temperature, and humidity sensors; leveraged **ML** algorithms.
- Proposed solution addresses a critical market need with potential to **reduce gas leak hazards by up to 50%**.

PUBLICATIONS

- Published a paper titled “*Ethical Approach Towards Singularity by Reducing Biases in the Field of Hiring Employees*” at the **Springer ICACCP conference**, exploring mitigation of biases in recruitment through ethical AI.
- Authored a paper “*Enhancing DNA-Based Data Storage: Addressing Random Access and Error Correction Challenges*,” accepted at the **IEEE Explore’s ICRETM Conference**.

EXTRACURRICULAR

- Winner at **Hack NYU**; built a marketplace using **Solana**, **Snowflake**, and **Visa APIs** reducing carbon footprints.
- Coordinated campus placement drives and conducted seminars/workshops for **200+** peers, streamlining interactions.
- National level Artistic Skater, an avid Runner/Cyclist and a stage Actor.
